Forecast for Wednesday 22 Nov 2023

Weather: A dull morning with patchy light drizzle, these becoming confined to western fells by early afternoon. Then rather cloudy through the evening with further patchy light rain and drizzle.

Chance of cloud-free hill tops above 800m: Little chance through the morning, but improving to 40% in west and 75% in east by early afternoon.

Low cloud and visibility: Periods or persistent cloud above 600-750m lowering, especially over western fells, to 450m at times in precipitation, cloud becoming, especially in east, more occasional above 750m during the afternoon. Away from cloud visibility good becoming several kilometres in rain and drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold on the fells, with gusts close to 60mph over ridges and summits developing in the afternoon.

Forecast for Thursday 23 Nov 2023

Weather: Cloudy through much of the morning with further outbreaks of rain and drizzle, these becoming more persistent and perhaps occasionally heavy around the middle of the day. Turning brighter, and colder, late afternoon and evening with a few light showers, these turning increasingly wintry above about 800m.

Maximum wind: Westerly 35-45mph, gusts increasing to around 70mph through the morning over ridges and summits, winds then turning more northwesterly in the afternoon and gradually easing 25-35mph.

Chance of cloud-free hill tops above 800m: Similar to Wednesday, little chance for most through the morning, but 25% across far eastern fells, improving to 75% late afternoon.

Low cloud and visibility: Periods or persistent cloud above 600-750m lowering, especially over western fells, to 450m at times in precipitation, cloud becoming more occasional above 750m during the afternoon. Away from cloud visibility several kilometres in rain and drizzle becoming good or very good in the afternoon with brief reductions, perhaps to a kilometre or so, in summit wintry showers.

Temperature: **Valleys:** Around plus 10 Celsius rising to plus 13 Celsius through the morning, falling to plus 5 or 6 Celsius by the end of the afternoon.
At 800m: Plus 6 Celsius falling to plus 1 Celsius through the late afternoon and evening.
Freezing level: Above summits falling to around 900m through the late afternoon and evening.
